GUIDE**

## Boxer logomark usage - **Brand architecture**

---

The Snap-on metallic logomark is only used when depicting the breadth of Total Shop Solutions in conjunction with other Snap-on RSI brands and logomarks, such as a trade show application. The wrench S is also only used in that context. The Snap-on logomark and wrench S are only seen in the context of promoting the Total Shop Solutions value proposition — many brands working together to meet the needs of the shop.

The Snap-on logomark and the wrench S are not seen with the Boxer logomark. Snap-on is only mentioned in body copy, with reference to the Snap-on RSI Total Shop Solutions.

### **Corporate level**

The Snap-on logomark may only be used when making the affiliation to Snap-on Incorporated. The Snap-on wrench S is only used when an icon is appropriate and the Snap-on logomark is also present. This corporate level use includes trade shows where multiple Snap-on RSI brands are visible, i.e. SEMA, NADA, Automechanika, etc. Its use may also include email addresses, business cards, stationery and on buildings.

### **Product group level**

Snap-on Equipment always appears in text. It is a description for a group of products, and is not a logomark. It may be used in boilerplate content for press releases or in the address line on brochures, advertising, etc.

### **Product brand level**

Individual product brand logomarks are seen in product marketing collateral, advertising, headers for public relations activities, internal training documents, etc. The Boxer logomark is included at this level, along with John Bean, Kansas Jack, Blackhawk, Sun, Cartec and Boxer.

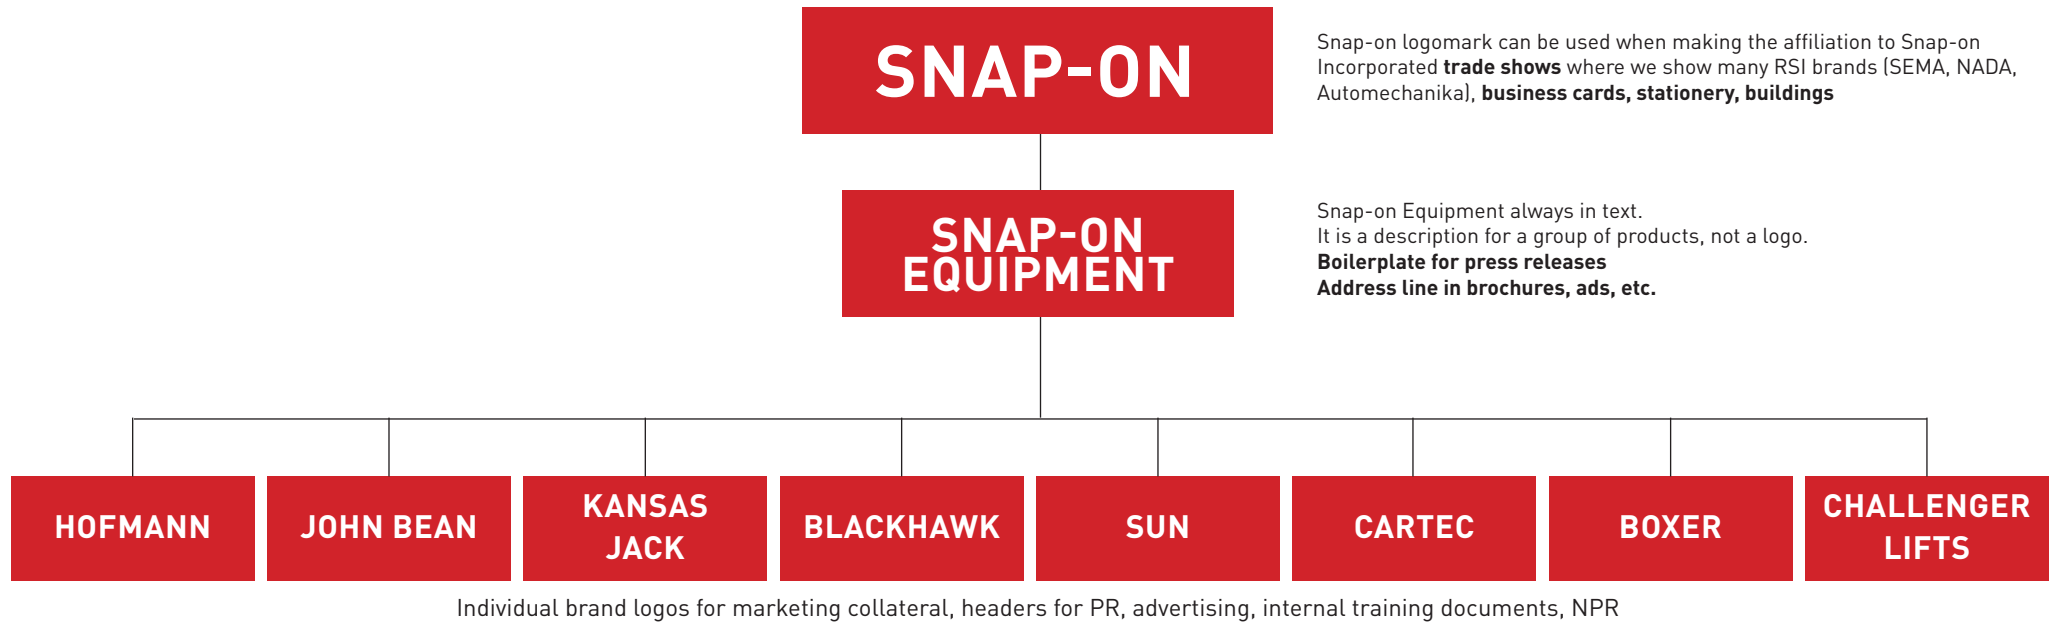

### **Individual products**

Logomarks for individual products are not allowed or encouraged.

The brand usage hierarchy is illustrated on the following page.

## Boxer logomark usage - **Minimum size & Maximum size**

---

To maintain legibility and detail, **the Boxer logomark should not appear smaller than 1 inch** (25.4mm) in any application.

1 inch  
25.4 mm  
6 picas  
72 points  
72 pixels

**A maximum size** is recommended for the Boxer logomark usage on literature, advertising and apparel. In order to maintain a level of professionalism without using overstatement to communicate, it is recommended that the Boxer logomark not appear larger than 3.25 inches (83 mm) in any application. This also applies to product literature.

2.87 inches  
73 mm  
17.24 picas  
207 points

## Boxer logomark usage - **What not to do**

---

Modification or incorrect use of the Boxer logomark will weaken its brand identity and recognition and is not allowed. The following are just a few examples of what NOT to do.

**Don't horizontally or vertically squash:**

**Don't horizontally or vertically stretch:**

## Boxer logomark usage - What not to do: Snap-On Equipment

---

Improper use of the Snap-on Equipment identity will weaken the product brands, such as Boxer, and the following usage guidelines must be followed.

Do not use Snap-on Equipment as a logomark or create a logomark for it.

Do not use a Snap-on Equipment logomark in conjunction with the Boxer logomark.

Always refer to the Snap-on Equipment name in text content, appearing as plain text.

Don't horizontally or vertically stretch:

## Boxer logomark usage - **Boxer typography: display and text typefaces**

---

Typography is a key to successful and legible communications and contributes to a consistent look for Boxer communications.

Consistency with Snap-on brand identity standards, where possible, maintains the Boxer relationship to Snap-on.

**THE SWING-ARM TYRE CHANGER S 30-20**  
 with low footprint and 20" outside clamping capability ideal for the use in general service shops

- The strong and rugged design of all components ensures long life
- The mounting arm swings to the side so that the machine can be installed in a space-saving way directly next to wall
- The double-acting bead breaker cylinder ensures gentle handling of rims
- The bead breaker is provided with a large anti-skid rubber pad to protect tyres and rims

- Plastic protectors inside the mounting head protect delicate alloy rims
- The one-part mounting head is manually adjusted in spaced-apart position relative to the rim to avoid any damage
- The S 30-20 comes standard with the professional bead lever plus
- The MH 310 PRO pneumatic bead assist device, jaw and blade protectors are available as optional extras
